

Chatbot Case

ABOUT PROJECT

Web site + integrated chatbots for Viber and Facebook Messenger. We designed the website with inbuilt calculator for estimation of the customer's credit rate. This calculation can be sent to several banks which offer consumer loans by one click step. The system is integrated with web interfaces of the partner banks, so that their managers can review the customer request and make a decision about credit for them. The copy of calculations is sent to the customer's email.

FEATURES

- Making estimations ○
- Data exchange with banks ○
- Sending requests
- Data management

OUTCOME

5+ months
Project Duration

6 people
Project Team

INDUSTRY

- Fintech

TECHNOLOGY

- PHP 7
- Laravel
