

## Cryptocurrency Exchange Service

### ABOUT PROJECT

This decentralized cryptocurrency exchange service is a unique platform for the profitable purchase/sale of cryptocurrency under the credible security of smart contracts and payment systems all over the world.

### SOLUTION

Our blockchain development team worked on this project with security and privacy in mind. This platform is based on:

- Algorithms to ensure the most efficient bid-offer matching;
- Distributed-wallets infrastructure that is accepted by many merchants and ATMs around the world;
- User-friendly interface that allows customize settings as well as the whole workspace entirely.

Besides, all cryptocurrency transactions on the platform proceed without any commissions and investors can officially purchase tokens regardless of their location. The Platform supports partnership with the largest payment systems.

### OUTCOME

**5+ months**  
Project Duration

**6 people**  
Project Team

### INDUSTRY

- Fintech
- Banking
- Investment
- Retail

### TECHNOLOGY

- Java
