

International Digital Investment Platform

ABOUT PROJECT

This online platform facilitates real estate investment by leveraging blockchain and financial regulations. It is developed for real estate asset managers to issue their shares as blockchain tokens.

SOLUTION

We provided a fully customizable solution for an investment platform based on the latest blockchain technologies according to the business demands to make it secure, reliable, fast and user-friendly. We succeeded in:

- Developing a decentralized wallet for storing funds and digitized assets;
- Using machine learning algorithms for automated management of investments;
- Secure identification methods;
- Fast access to all investment products on the platform;
- Creating user-friendly investment software.

OUTCOME

4+ months
Project Duration

3 people
Project Team

INDUSTRY

- Fintech
- Real estate
- Security token

TECHNOLOGY

- Ethereum
- Solidity
- Java
- Spring
